		Begin	END	
Record_type	12	1	12	NSDIAG_TR
COMP	3	13	15	Must equal your component code (085 = ValueOptions)
CASE	10	16	25	NS_ID
BATCH_NO	2	26	27	Filler
TRANS_ENTER_DT	8	28	35	Date transaction was entered (VO system date)
LASTUP_ID				User ID of the person that entered the transaction on your
_	8	36	43	local system (VO probabably leave blank)
LOG_TRAN_NO	6	44	49	Use as sort for processing order.
DSM Flag	1	50	50	Must equal "B"
Filler A	13	51	63	blank
ID	10	64	73	blank
LASTNM				Consumer last name. Last name must match last name on
	16	74	89	CARE
LAST SUF	3	90	92	Suffix to consumer's name, e.g., 'JR', 'SR', 'I', 'II', etc.
FIRSTNM				Consumer first name. First initial must match first initial on
	11	93	103	CARE.
MIDNM	1	104	104	Consumer middle initial
Filler	9	105	113	Filler
EFF DT	_		_	Must be within the client NS enrollment dates. If a diagnostic
_				data already exists for this consumer with the same decision
	8	114	121	date, this transaction will be rejected.
FORM TM				Time recorded on the CARE-DG-1 form. HHMM military
	4	122	125	format.
REAS ACT	1	126	126	1=Admission, 2=Reevaluation, 3 = Death, 4 = Discharge.
AXIS IND	1	127	127	Identifies principle axis (values = 1 or 2)
DSM11				Axis I Level I. DSM code for psychiatric syndromes diagnoses.
				Level 1 indicates the most significant diagnosis, level 6 least
				significant. This field is required if principal Diag Axis equals
	5	128	132	'1'.
DSM12				Axis I Level 2. DSM code for psychiatric syndromes
5011112				diagnoses. Level 1 indicates the most significant diagnosis,
	5	133	137	level 6 least significant.
DSM13		100	107	Axis I Level 3. DSM code for psychiatric syndromes
DOMITO				diagnoses. Level 1 indicates the most significant diagnosis,
	5	138	142	level 6 least significant.
DSM14		100		Axis I Level 4. DSM code for psychiatric syndromes
DOMIT				diagnoses. Level 1 indicates the most significant diagnosis,
	5	143	147	level 6 least Significant.
DSM15		1 10		Axis I Level 5. DSM code for psychiatric syndromes
DOMITO				diagnoses. Level 1 indicates the most significant diagnosis,
	5	148	152	level 6 least Significant.
DSM16		170	102	Axis I Level 6. DSM code for psychiatric syndromes
DOIVITO				diagnoses. Level 1 indicates the most significant diagnosis,
	5	153	157	level 6 least Significant.
DSM21	<u> </u>	100	101	Axis 2 Level 1. DSM code for personality, specific
DOIVIL 1				developmental disorders and mental retardation. Level 1
				indicates the most significant diagnosis, level 4 the least
				significant. This field is required if principal DIAG AXIS equals
	5	158	162	'2'.
